

# Aleksandr Anisimov

anisima@rose-hulman.edu | (812) 543-3024 | <https://aadev151.github.io> | Terre Haute, IN

**Objective:** Secure an internship in the fields of Software Engineering or Computer Science

**Education:** **Bachelor of Science, Software Engineering** **May 2027**  
Rose-Hulman Institute of Technology, Terre Haute IN  
*Related Courses: Object-Oriented Software Development, Introduction to Computer Systems Design, Introduction to Entrepreneurship, Calculus III*

**Skills:** *Technical:* Python, SQL, HTML, CSS, JavaScript, jQuery, C++; Flask, Django, Flask-Login, SQLAlchemy, Pygame, PyQt5; Bootstrap; APIs, adaptive layout, iOS development, Git, .env  
*Languages:* Russian (native)

**Experience:** **Web Developer, Full-Stack Developer** **2020 – 2023**  
*Freelancer*

- Develop personal web pages and websites for businesses, such as a jewelry store, a pharmacy, and a confectionery
- Build both front end and back end, utilizing HTML, CSS, and Python and advise customers on the design of web pages
- Volunteer as a web developer for nonprofits
- Example: <https://nogotochki.xyz> (may require VPN)

**Projects:** **HelpUnicorn** **2021 – 2023**

- Founded a network of welfare funds and IT specialists to offer free assistance to charities
- Implemented website's authentication (including email confirmation and password reset), database, private chat, and API; co-authored iOS app; developed mini website builder for charities
- Motivated teammates, represented site at conferences, enabled collaboration with foreign funds and developers
- Saved \$3000+ for charities and encouraged 1000+ users to join

**AntiGPT** **Spring 2023**

- Built a website identifying ChatGPT-written text in 50+ languages
- Employed OpenAI API; used JavaScript to get text from an input field or uploaded files and support multi-thread upload
- Currently discussing integration into the admissions process for RHIT

**Kitty Sneakers** **Oct – Dec 2022**

- Started a mock sneaker store page to provide all functionality an online store expects
- Used Django and Bootstrap to work with database, fixtures, admin page, authorization, posting and deleting products, star rating, product galleries, tags
- Utilized Git, worked with branches and Github issues and pull requests; employed environment variables, .env file, and .gitignore; worked with virtual environments

**Duckstyle** **May 2022**

- Designed a system to buy and sell pictures of ducks, top up balance, withdraw money, and get currency for ads to mock an NFT auction and educate users about NFTs
- Coordinated team and arranged weekly meetings to ensure project success

**Squid Pygame** **Feb 2022**

- Utilized various Pygame techniques to create a desktop game inspired by Netflix series
- Designed the concept of the levels to captivate users' attention and repeat series' plot

**Activities:** ESCALATE Entrepreneurial and Business Thinking Program, *RHIT*  
Rose Squared Program (combined Bachelor's and Master's in 4 years), *RHIT*

**Leadership:** Head of Student Council, *Lyceum 1535 (High School)*  
Head of School Newspaper Publications, *Lyceum 1535*

**Honors:** Noblitt Scholar, 1/29 freshman recipients, promoting curiosity and leadership, *RHIT*  
2x Academic Achievement Gold Medals & 5.0/5.0 GPA, *Lyceum 1535*
